

This loop is fairly easy. It begins at the intersection of FH3 and FS125 and ends up just south of the starting point at FH3 again. The section between “Keep Right” and “Left” doesn’t show up on most maps, but the route does go through. There is a nice rocky uphill section in this portion of the loop. A side trip (shown in yellow) leads to a gate where you can walk through and up to an old fire tower, complete with the remains of the watch-person’s residence.
