

As of January 2026, the OC Fair & Event Center requires all campers to bring their own one hundred feet (100') of 6/4 SOOW type extension cord with 50 Amp Cali Twist (Hubble CS6364C) for each RV you need to hook up according to your connector.

If you do not have the proper equipment, we suggest a Park World 886399 Shore Power 50A to RV & EV Power Adapter Cord Hubble CS6369 to 14-50R 1.5ft.

There is a 30 Amp cord adapter 3 prong Twist Lock male to female outlet receptacle and a 50 Amp cord adapter 4 prong twist lock male to female outlet receptacle that the camper must provide, depending on what their RV needs are.

The OC Fair & Event Center standard 50 Amp 125/250 Volt single phase connection utilizes ANSI C73-111/NEMA SS2-50 Twist Lock cord cap.

The OC Fair & Event Center will not supply any cords or adapters, please arrive on site prepared.

Thank you
